If you've got the Will we've got the way

by making a donation or bequest you could save
a life perhaps someone very close to you...

How? Almost 50% of Australians die without making a Will. To assist in overcoming this problem, the Heart Foundation has developed a free booklet entitled "Guide to Wills and Bequests". As Australia's leading heart health charity, the Heart Foundation is funded almost entirely by public donations including bequests in Wills. Bequests which are 'gifts left in Wills' are the largest source of the Heart Foundation's financial support, representing approximately 50% of our entire donations.

Because every dollar does count

The Heart Foundation encourages everyone to seek appropriate professional advice when making a will. The Heart Foundation has also prepared a FREE booklet entitled "Guide to Bequests and Wills" a simple straight forward guide on how to make a Will and perhaps include a gift to the Heart Foundation. Your donation or bequest in your Will is our main source of charitable revenue. Help us fight Australia's No. 1 killer today - because every dollar counts!

For a copy of this very informative booklet...
